

SUCCESS STORY

VOICE NETWORKING

MVP Health Plan

East Greenbush, NY

The Challenge:

MVP Health Plan, one of the largest health insurance organizations in the Northeast, was relocating its headquarters to a newly-constructed, seven-story building in a newly revitalized section of downtown Schenectady, New York. This facility was home to more than 450 staff members, the company data center and the main corporate telephone system. The relocation needed to be well planned and flawlessly executed. MVP was also concerned about the survivability, flexibility and the transparency of their new network infrastructure.

The Solution:

TAG Solutions partnered with MVP early in the planning phase, collaborating with the architects and engineers to ensure that no design detail was overlooked. MVP opted for our Siemon-Commscope Category 6 "Vision Solution", which provided the performance and investment protection they required while affording maximum flexibility for future voice and data moves.

The Return:

By working closely with MVP and project planners from the beginning, TAG Solutions had intimate knowledge of MVP's requirements and constraints. Our engineers adjusted the network design as challenges arose—not after arriving on-site. This relationship guaranteed that the network design and infrastructure served MVP's needs as the project unfolded and allowed TAG Solutions to manage the implementation effectively—**meeting the budget and beating the project deadline.**
